I am not member of a SwissPSA school. May I use the system too?

No. If you are interested in using the system contact the developer "helmut@aerolocarno.ch".

My licence is not listed in the dropdown menu of the "User Info". How can I add my licence to the list ?

Go to the tab "Expiry Dates > Create Rating". Select "Licences" in the "Rating Group" dropdown menu. In the Rating Name field enter your licence. Now your licence will appear in the "User Info".

My requested rating is not listed in the dropdown menu when I try to add a rating to my list.

If your rating does not yet exist, you can create it. Go the "Create Rating" page in the "Expiry Dates"-Tab and follow the instruction. Once you have created the rating or licence type you can add it to your list on the "Add Rating" page.

I do not find all my ratings in the list of "Expiry Dates"-Tab.

You can add a rating to your list. Go to the "add rating" page and select the required rating.

I do not intend to renew an expired rating. How can I stop the system from sending me mail warnings?

You can set the rating inactive by unchecking the checkbox on the "expiry dates" page.
